Store Manual

5 Shopify Flow Recipe Cards

Build each one in about five minutes. No code. Works on Basic, Shopify, Advanced and Plus plans.
Card 1 was built end to end in our test store. For cards 2 to 5 every trigger and action was confirmed in Flow on 17 Nov 2026.

How to use these cards

1. In your Shopify admin open **Apps → Shopify Flow** (install it free if you have not yet).
2. Click **Create workflow**, then add the trigger, condition and actions from a card.
3. Click **Turn on workflow**. Place a test order to confirm it runs.

1. Tag VIP customers automatically

Replaces: customer tagging / segmentation apps

TRIGGER	Order created
CONDITION	Add a variable → search "total price" → `order / totalPriceSet / shopMoney / amount` is greater than or equal to `300`
ACTIONS	On the True branch: Add customer tags → `VIP` Send internal email → yourself

Tip: set the threshold to about 3× your average order value.

2. Unpublish sold-out products and alert your supplier

Replaces: low-stock and sold-out alert apps

TRIGGER	Product variant inventory quantity changed
CONDITION	Inventory quantity is less than or equal to `0`
ACTIONS	Unpublish product Send internal email → purchasing inbox (include product title and SKU)

Tip: taking pre-orders? Skip "Unpublish product" and keep only the email.

3. Hold high-risk orders before they ship

Replaces: fraud filter apps

TRIGGER Order risk analyzed

CONDITION Order risk level is equal to `High`

ACTIONS Hold fulfillment order
Add order tags → `fraud-review`
Send internal email → order reviewer

Tip: release the hold manually once a person has checked the order.

4. Alert your team about large first orders

Replaces: big-order notification apps

TRIGGER Order created

CONDITIONS Order total price is greater than or equal to `500`
AND customer number of orders is equal to `1`

ACTION Send internal email → support lead (include customer name, email, items)

Tip: send a personal thank-you within a few hours.

5. Clean up after cancelled orders

Replaces: cancellation clean-up apps

TRIGGER Order cancelled

ACTIONS Remove customer tags → campaign tags
Add order tags → `cancelled-reviewed`
Archive order

Tip: restocking is done by Shopify when you tick "Restock items" while cancelling.
